

The Fujitsu Sleep Pump[®]

When you need to get a good nights sleep

Fujitsu introduces the *first* fully designed ducted system for 3 rooms

Invisible, super-quiet and affordable, so you will always enjoy a comfortable night's sleep

- Cools and dehumidifies up to 3 rooms – say goodbye to hot sticky summer nights
- So quiet, you will hardly be aware that it is on
- Very energy efficient
- Cools to your desired resting temperature
- Reduces humidity for perfect air-conditioned comfort
- No need for open windows – keep out insects and burglars!
- Includes hi-tech wall controller, with 7 day timer – so you can just set and forget
- Reverse cycle – to keep you warm and cozy in winter too
- All the benefits and efficiency of a heat pump

NEW ZEALAND'S FAVOURITE AIR™

FUJITSU

DESIGNED TO HELP KIWIS SLEEP WELL!

NEW ZEALAND'S FAVOURITE HOME IMPROVEMENT

A great night's sleep is one of the most important factors in your family's health and well-being. Now the luxury of the Fujitsu Sleep Pump® is more affordable than you think. It doesn't matter what our climate throws at you – now you can sleep well throughout our summers **and** our winters

EFFORTLESS PERFORMANCE, FOR A COST EFFICIENT HOME

Fujitsu's inverter technology, coupled with high capacity and DC engineering can handle greater temperature extremes than conventional heat pumps, making them more economical and able to reach the desired temperature faster.

THE IMPORTANCE OF INSTALLATION

Fujitsu have the only accredited installer scheme in New Zealand. That means when you choose an installer who has achieved Fujitsu Accreditation, you can be assured of a professional installation, plus you will also get a full 6-year parts and labour warranty – New Zealand's longest.

DUCTED INSTALLER

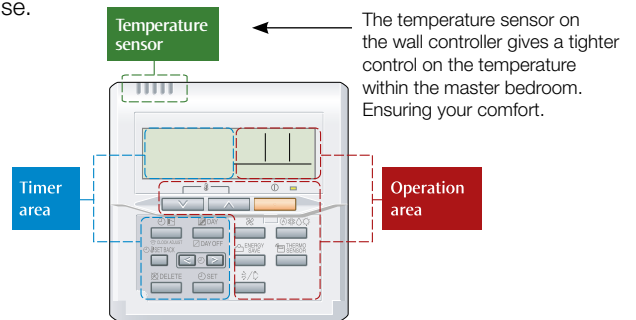

Fujitsu's specialist ducted system installers have attended training in airflow and ductwork applications and have access to Fujitsu's DuctCalc program. This program assists in the selection and application of a ducted system to provide the best comfort available, to give the extra reassurance that you will have the best possible workmanship for New Zealand's favourite air.

WALL CONTROLLER FEATURES

Easy to understand Operation

Variable time control

The operation / display sections are zoned according to timer and operation, enabling variable programming to match application. Sensible button layout makes this controller easy to use.

The temperature sensor on the wall controller gives a tighter control on the temperature within the master bedroom. Ensuring your comfort.

Program Timer Features

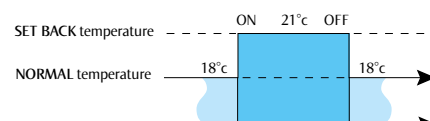

After the time has been set up the controller is then ready to set up selectable timer program options.

Weekly Timer – A simple 5 step process for easy set up of each day of the week, with the ability to select two on and off times per day.

Refer to the operation manual for more program tips, such as cancelling days.

Temperature set back timer

Use this timer function to change the set temperature during the on times set for each day of the week. This can only be set together with other programmed timer settings.

Fujitsu is approved by Asthma New Zealand
